

Let's talk about what's on my mind that's the episode of The Guy R Cook Report for today using winbroadcaster for live-streaming how recently Steven Healey of the be live of at five group shared some information about this product winbroadcaster

what I like about it why it's on my mind I think more than any other reason it's not browser dependent it's an app.

Okay so you can run this from your Windows 10 desktop or your Windows 7 starts professional streaming you can hook it up to Facebook YouTube other content anything that's rtmp I believe it is and that's what's on my mind there's a link in the show notes to go to [winbroadcaster.com](http://winbroadcaster.com) just like it sounds.

Thanks to the patrons that support The Guy R Cook Report thanks to all the people that are listed in the credits and those links are all in the show notes you get to them as always like you did today The Guy R Cook Report dot Podbean dot com or maybe you got here on youtube if you go to [youtube.com](http://youtube.com) whack [guyrcook](http://guyrcook) you can get here as well and on that note I'm gonna say we're done

It's a wrap
